```
1  # Python Programming Internship - Week 1 Task 2
2
3  ## Project Title
4
5  Functions, Lists & Basic Data Handling
6
7  ## Objective
8
9  The objective of this project is to learn Python functions, list operations, and create a simple
10 interactive command-line application.
11
12 ## Project Files
13
14 README.md
15
16 src/main.py
17
18 src/utils.py
19
20 docs/explanation.md
21
22 tests/test_utils.py
23
24 ## Features
25
26 * Add items to a list
27 * View all items
28 * Delete items from the list
29 * Exit the application
30
31 ## Concepts Used
32
33 * Functions
34 * Lists
35 * if-elif-else
36 * while loop
37 * User input
38
39 ## How to Run
40
41 Open the terminal and run:
42
43 python src/main.py
44
45 ## Learning Outcome
46
47 I learned how to create reusable functions, manage data using lists, and build a simple command-line
```

SRC

read_file.py

src

write_file.py

write_file.py > ...

```
1 import os
2
3 file_path = os.path.join(
4     os.path.dirname(__file__),
5     "..",
6     "data",
7     "quotes.txt"
8 )
9
10 with open(file_path, "a") as file:
11     print("Enter your 3 favorite quotes:")
12
13     for i in range(1, 4):
14         quote = input(f"Quote {i}: ")
15         file.write(quote + "\n")
16
17 print("Quotes saved successfully!")
```

PROBLEMS DEBUG CONSOLE OUTPUT TIMELINE TERMINAL PORTS

PS C:\Users\abhis\Downloads\SRC> python -u "c:\Users\abhis\Downloads\SRC\write_file.py"

Enter your 3 favorite quotes:

Quote 1: Never give up

Quote 2: Work hard

Quote 3: Keep learning

Quotes saved successfully!

PS C:\Users\abhis\Downloads\SRC> python -u "c:\Users\abhis\Downloads\SRC\write_file.py"

Enter your 3 favorite quotes:

Quote 1:

SRC

- read_file.py
- src
- write_file.py

Welcome src read_file.py x write_file.py

```
1 try:
2     with open("../data/input.txt", "r") as file:
3         content = file.read()
4
5     words = content.split()
6
7     print("==== FILE ANALYSIS =====")
8     print("Total Words:", len(words))
9
10 except FileNotFoundError:
11     print("Error: input.txt file not found.")
12
```

CHAT SESSIONS

Tip: Try the Plan agent to research and plan before implementing changes.

+ read_file.py

Welcome

file_modes.md

```
file_modes.md > # Python File Handling Modes > ## 1. Read Mode (r)
1 # Python File Handling Modes
2
3 ## 1. Read Mode (r)
4 - File ko read karne ke liye use hota hai
5 - File pehle se exist honi chahiye
6 - Agar file nahi mile to error aata hai
7
8 Example:
9 ```python
10 open("file.txt", "r")
```

DATA

Welcome

input.txt

input.txt

quotes.txt

input.txt

```
1 Python is a powerful programming language.  
2 File handling allows us to store data permanently.  
3 This project demonstrates reading and writing files in Python.  
4 Learning file handling is important for real world applications.
```

I
